

MACROECONOMIC MONITOR OF CYPRUS

December 2019

MACROECONOMIC MONITOR OF CYPRUS

Updated on 18 December 2019

Macro economy

- **In the 3rd quarter of 2019, GDP** (in seasonally adjusted terms) **recorded a positive rate of growth of 3.4%, compared with 3.2% in the 2nd quarter of 2019** on an annual basis (see graphs 1.1-1.2). The increased activity is mainly attributed to the sectors: construction, information and communication, professional, scientific and technical activities, administrative and support service activities and arts, entertainment and recreation. Negative growth rate was recorded by the sector financial and insurance activities (see graphs 3.1-3.4 and 6.1-6.2).
- Developments are currently driven by increases in **domestic demand (private consumption and GFCF)** (see graphs 2.1-2.4).
- The economic sentiment indicator (ESI-CypERC) improved in November 2019, it increased by 1.2 points compared to October 2019 (see graph 1.3). The increase resulted mainly from stronger business confidence among firms in services and construction as well as from confidence improvements among consumers.
- During January-November 2019, **tourist arrivals marginally increased at a rate of 0.9%** compared to January-November 2018 (see graph 6.3). An increase of 25.3% was recorded in tourist arrivals from Israel; a 0.1% increase was recorded in arrivals from the UK, a 0.2% decrease from Russia, a 5.6% decrease from Greece and a 19.7% decrease from Germany.
- **Employment** developments reflect conditions of strong economic activity. Employment in persons recorded an **increase of 3.2%** in the first nine months of 2019 compared to the same period in 2018. Increases were recorded mainly in construction, professional, scientific and technical activities, wholesale and retail trade, hotels and restaurants, manufacturing and education.
- **Labour Force Survey (LFS) unemployment**, in monthly seasonally adjusted terms, **decreased to 7.1% in October 2019 compared to 7.5% in October 2018** (see graphs 4.2-4.3). The most affected segment of the population is youth unemployment, although it has been on a downward trend since the 3rd quarter of 2013 falling to 16.9% in 2019Q3 from a peak of 40.8% in the 2nd quarter of 2013.
- **Compensation per employee** recorded an increase of 4.6% in the first nine months of 2019 compared to the same period in 2018 (see graphs 5.3-5.5).
- **Inflation (HICP)** in November 2019 recorded an increase of 0.5% compared with a decrease of 0.5% in October 2019 (see graph 5.1). For 2019, so far it stands at 0.5%. Core HICP stood at 0.6% in January-November 2019 (see graph 5.2). All subcategories of HICP presented an increase except categories clothing and footwear, health, transport and communication.
- **Imports of goods recorded a decrease of 7%** in January-October 2019 compared to January-October 2018. The decrease in imports is affected by developments in imports of transport equipment (aircrafts and vessels). Imports of goods, excluding imports of aircrafts and vessels, exhibit a decrease of 4.4%.
- **Exports of goods recorded a decrease of 32.8%** in January-October 2019 compared to January-October 2018 due to exports of transport equipment (aircrafts and vessels) occurring in 2018. Exports of goods, excluding exports of aircrafts and vessels, exhibit a decrease of 24.7%.

External Sector

- The **current account (CA)** balance (see graph 6.4) worsened in 2019Q2, recording a deficit of €203.6 mn, compared with a deficit of €88.4 mn in 2018Q2. This development was mainly attributed to the deterioration in the trade balance of goods and, to a much lesser extent, services. Primary and secondary income, on the other hand, recorded small increases, thus mitigating the abovementioned deterioration. For 2019H1 the deficit is €791.5 mn (-3.6% of GDP), compared with a deficit of €77 mn (-0.4% of GDP) in 2018H1. Adjusted for SPEs, the deficit in 2019H1 is -3.9% of GDP compared with -2.4% of GDP in 2018H1.
- The **international investment position (IIP)** (see graph 6.5) recorded a marginal improvement in 2019Q2, showing a net liability position at €24,834.0 mn, compared with €24,888.2 mn in the previous quarter. This was mainly due to the increase recorded in the category “other investment” and to a much lesser extent in derivatives and reserves. This increase was mainly mitigated, by the decrease in foreign direct investment and, to a lesser extent, portfolio investment.
- The **gross external debt** reached €208,114.5 mn in 2019Q2, compared with €205,867.1 mn in 2019Q1. This worsening was mainly due to the increase in government debt and intercompany lending.
- The **net external debt** reached €87,449.5 mn in 2019Q2, compared with €86,932.7 mn in 2019Q1.

Public Finances

- **General government budget balance (GGBB)** continued to be in surplus in January-October 2019, of the order of €1,066.0 mn (4.9% of GDP) compared to a deficit of €626.4 mn (-3% of GDP) during the corresponding period the year before (see graph 9.1). The January-October 2018 deficit includes the cost of the Cyprus Cooperative Bank-Hellenic Bank deal.
- **General government primary balance (GGPB)** also recorded a surplus in January-October 2019, of the order of €1,498.8 mn (6.8% of GDP) compared to a deficit of €247.2 mn (-1.2% of GDP) during the corresponding period the year before (see graphs 9.1-9.2).
- **Total revenue** exhibited a positive rate of growth of about 11.9%, reaching €7,415.8 mn in January-October 2019, compared to €6,628.8 mn during the corresponding period the year before (see graph 9.3).
- **Total expenditure** exhibited a decrease of about 12.5%, reaching €6,349.8 mn in January-October 2019, compared to €7,255.2 mn during the corresponding period the year before (see graph 9.3).

Property Market

- Eurostat’s **house price index** for Cyprus recorded an **increase of 8%** in the **2nd quarter of 2019** compared to the 2nd quarter of 2018 and an increase of 4.2% compared to the 1st quarter of 2019.
- The CBC’s **residential property price index** recorded an **increase of 0.7%** in the **1st quarter of 2019** compared to the 4th quarter of 2018 and an increase of 2.7% compared to the 1st quarter of 2018. Cumulative from the 1st quarter of 2008 it has exhibited a decline of 25.5% (see graph 7.1), revealing an adjustment to the conditions of lower domestic and foreign demand.
- According to the Department of Lands and Surveys, new sale contracts were up by 12% while, transfers of property were down by 2.2% in January-November 2019 compared to January-November 2018 (see graph 7.3).
- MFI mortgage loans to domestic residents for housing increased with an annual rate of 0.4% in October 2019 (see graph 7.2).

Banking Sector Developments

- Monetary Financial Institutions (MFI) **loans to domestic residents** (private sector), **increased by 1.0%** in October 2019, (see graphs 8.2-8.4). This reflects the still tight lending conditions (see graphs 8.6-8.7).
- **Deposits of domestic** residents held with MFIs (private sector) exhibited an **increase of 2.9%** in October 2019 (see graph 8.1).
- Overall **lending and deposit interest rates** in Cyprus continue to decline, creating an environment conducive to growth (see graph 8.5). In October 2019, **deposit interest rates** for maturity of up to 1 year and of up to 3 months decreased compared with the preceding month. The **lending interest rates** to households for primary residence and the rate for other loans up to €1 mn for businesses decreased. The interest rate for bank overdrafts to non-financial corporations marginally increased.
- NPEs in absolute terms fell to €9.8 bn in July 2019, exhibiting a reduction of 5.6% compared to the December 2018 or by €585 mn in absolute terms.
- The significant decrease of NPEs in 2018, is mainly attributed to the transfer of €5.7 bn NPEs of former CCB to a state - owned Asset Management Company (KEDIPEs) and the sale of NPE portfolios (including the sale of €2.7 bn NPEs by Bank of Cyprus in June 2018 to Apollo Fund), as well as increased repayments, loan restructurings successfully completed and reclassified as performing facilities, write-offs and settlement of debt through swaps with immovable property.
- NPEs are classified based on the harmonised definition of the European Banking Authority, which includes loans that have been restructured and, even despite meeting their revised repayment schedule, retain the NPE status for at least 12 months after restructuring before being reclassified as performing.
- Accumulated provisions rose to 53.4% of NPEs in July 2019 (48.4% in July 2018), compared to 51.4% as at the end of 2018, thus facilitating restructuring activity with a view to cure NPEs of viable customers.

Credit ratings

- On 15/11/2019, DBRS Ratings confirmed the Republic of Cyprus's Long-Term Foreign and Local Currency - Issuer Ratings at BBB (low) and changed the trend to Positive from Stable.
- On 11/10/2019, Fitch Ratings has revised the Outlook on Cyprus's Long-Term Foreign-Currency Issuer Default Rating (IDR) to Positive from Stable and affirmed the IDR at BBB-.
- Additionally, on 20/09/2019, Moody's Investors Service changed the outlook on the Government of Cyprus's Ba2 ratings to positive from stable. Concurrently, Moody's has affirmed the Ba2 long-term issuer and senior unsecured ratings, and the (P)Ba2 programme ratings. Cyprus's short-term ratings have also been affirmed at Not Prime (NP) and (P)NP.
