May 2019

MACROECONOMIC MONITOR OF CYPRUS

Updated on 17 May 2019

Macro economy

- **In the 1st quarter of 2019, GDP** (in seasonally adjusted terms, flash estimate) **recorded a positive rate of growth of 3.5%, compared to 3.8% in the 4th quarter of 2018** on an annual basis (see graphs 1.1-1.2). The increased activity is mainly attributed to the sectors: hotels and restaurants, retail and wholesale trade, construction, manufacturing, professional, scientific and technical activities and administrative and support service activities. Negative growth rate was recorded by the sector financial and insurance activities (see graphs 3.1-3.4 and 6.1-6.2).
- Developments are currently driven by increases in **private consumption and net exports** (see graphs 2.1-2.4).
- The economic sentiment indicator (ESI-CypERC) in April 2019, increased by 2.4 points compared with March 2019 (see graph 1.3). The increase was driven by stronger business confidence in services and, to a smaller degree, confidence improvements in industry and among consumers.
- In January-April 2019 **tourist arrivals increased at a rate of 0.5%** compared to January-April 2018 (see graph 6.3). An increase of 2.6% was recorded in tourist arrivals from the UK, a 2.4% decrease from Russia, a 2.6% decrease from Greece and a 21.1% decrease from Germany.
- **Employment** developments reflect conditions of strong economic activity. Employment in persons recorded an **increase of 4.0%** in 2018 compared to 2017. Increases were recorded mainly in construction, accommodation and food service activities, wholesale and retail trade professional, scientific and technical activities and manufacturing.
- **Labour Force Survey (LFS) unemployment**, in monthly seasonally adjusted terms, **decreased to 7.0% in March 2019 compared to 9.0% in March 2018** (see graphs 4.2-4.3). The most affected segment of the population is youth unemployment, although it has been on a downward trend since the 3rd quarter of 2013 falling to 20% in 2018Q4 from a peak of 40.4% in the 3rd quarter of 2013.
- **Compensation per employee** recorded an increase of 0.1% in 2018 compared to 2017 (see graphs 5.3-5.5).
- **Inflation (HICP)** in April 2019 recorded an increase of 1.2% compared to an increase of 1.1% in March 2019 (see graph 5.1). For 2019 so far it stands at 1.3%. Core HICP stood at 0.6% in January-April 2019 (see graph 5.2). All subcategories of HICP presented an increase except categories alcoholic beverages and tobacco, furnishings, health, transport and communication.
- **Imports of goods recorded a decrease of 0.3%** in January-March 2019 compared to January-March 2018. The increase in imports is affected by developments in imports of transport equipment (aircrafts and vessels). Imports of goods, excluding imports of aircrafts and vessels, exhibit a decrease of 3.2%.
- **Exports of goods recorded a decrease of 27.6%** in January-March 2019 compared to January-March 2018 due to exports of transport equipment (aircrafts and vessels) occurring in 2019. Exports of goods, excluding exports of aircrafts and vessels, exhibit a decrease of 28.3%.

External Sector

- The **current account (CA)** balance (see graph 6.4) improved in 2018, recording a deficit of €1,460.9 mn (7% of GDP), compared with a deficit of €1,642.5 mn (8.4% of GDP) in 2017. This development was attributed to the trade balance of goods, in particular exports of goods, mostly ships, which, during the year under review, recorded a higher increase than the respective imports. The aforementioned

development was mitigated, mainly by the decrease recorded in services and, to a lesser extent, by the decrease recorded in primary and secondary income. The CA balance for 2018 adjusted to exclude imports/exports of Special Purpose Entities (SPEs) that primarily operate in the shipping industry (ship registration/deregistration) with a small footprint on the economy, recorded a deficit of 4.5% of GDP compared to a deficit of 3.1% of GDP the year before.

- The **international investment position (IIP)** (see graph 6.5) remained virtually the same in 2018, showing a net liability position at €23,774.2 mn, compared with €23,784.7 mn the previous year. Foreign direct investment recorded a decrease in 2018 while portfolio investment and other investment registered an increase, nullifying the above decrease.
- The **gross external debt** reached €102,533.2 mn in 2018, compared with €108,512.2 mn in 2017. This improvement was mainly due to the debt decrease of monetary financial institutions (excluding the CBC) and, to a lesser extent, the decrease in intercompany lending.
- The **net external debt** reached €21,935.7 mn in 2018, compared with €28,248.9 mn in 2017.

Public Finances

- **General government budget balance (GGBB)** continued to be in surplus in January-February 2019, of the order of €407.3 mn (1.9% of GDP) compared to a surplus of €254.3 mn (1.2% of GDP) during the corresponding period the year before (see graph 9.1).
- **General government primary balance (GGPB)** also recorded a surplus in January-February 2019, of the order of €468.7 mn (2.2% of GDP) compared to a surplus of €307.5 mn (1.5% of GDP) during the corresponding period the year before (see graphs 9.1-9.2).
- **Total revenue** exhibited a positive rate of growth of about 20%, reaching €1,514.5 mn in January-February 2019, compared to €1,262.5 mn during the corresponding period the year before (see graph 9.3).
- **Total expenditure** exhibited a positive rate of growth of about 9.8%, reaching €1,107.2 mn in January-February 2019, compared to €1,008.2 mn during the corresponding period the year before (see graph 9.3).

Property Market

- Eurostat's **house price index** for Cyprus recorded an increase of 1.6% in the 4th quarter of 2018 compared to the 4th quarter of 2017.
- The CBC's **residential property price index** recorded an increase of 0.3% in the 3rd quarter of 2018 compared to the 2nd quarter of 2018 and an increase of 1.6% compared to the 3rd quarter of 2017. Cumulative from the 1st quarter of 2008 it has exhibited a decline of 27% (see graph 7.1), revealing an adjustment to the conditions of lower domestic and foreign demand.
- According to the Department of Lands and Surveys, new sale contracts were up by 23% while, transfers of property were down by 6.4% in January-April 2019 compared to January-April 2018 (see graph 7.3).
- MFI mortgage loans to domestic residents for housing increased with an annual rate of 0.1% in March 2019 (see graph 7.2).

Banking Sector Developments

- Monetary Financial Institutions (MFI) **loans to domestic residents** (private sector), **increased at an annual rate of 1%** in March 2019, (see graphs 8.2-8.4). This reflects the still tight lending conditions (see graphs 8.6-8.7).
- **Deposits of domestic** residents held with MFIs (private sector) exhibited an increase with an **annual rate of 1.1%** in March 2019 (see graph 8.1).
- Overall **lending and deposit interest rates** in Cyprus continue to decline, creating an environment conducive to growth (see graph 8.5). In March 2019, **deposit interest rates** for maturity of up to 1 year increased and of up to 3 months decreased compared with the preceding month. The **lending interest rates** to households for primary residence and the rate for other loans up to €1 mn for businesses decreased. The interest rate for bank overdrafts to non-financial corporations also decreased.
- NPEs represent the remaining legacy challenge currently faced by the Cyprus economy, amounting to approximately 30.5% in December 2018 compared to 42.5% in December 2017.
- NPEs in absolute terms are on a downward trend, falling to €10.4 bn in December 2018, representing a decrease of €10.5 bn or 50.2% in 2018.
- The significant decrease of NPEs in 2018, is mainly attributed to the transfer of €5.7 bn NPEs of former CCB to a state - owned Asset Management Company (KEDIPES) and the sale of NPE portfolios (including the sale of €2.7 bn NPEs by Bank of Cyprus in June 2018 to Apollo Fund), as well as increased repayments, restructurings successfully completed and reclassified as performing facilities, write-offs and settlement of debt through swaps with immovable property.
- NPEs are classified based on the harmonised definition of the European Banking Authority, which includes loans that have been restructured and, even despite meeting their revised repayment schedule, retain the NPE status for at least 12 months after restructuring before being reclassified as performing.
- Accumulated provisions rose to 51.2% of NPEs in December 2018, compared to 47.3% as at the end of 2017, thus facilitating restructuring activity with a view to cure NPEs of viable customers.
- On 24/01/2019, Moody's upgraded Bank of Cyprus and Hellenic Bank Public long-term deposit ratings to B3 from Caa1, and their long-term Counterparty Risk Ratings (CRRs) to B1 from B2. At the same time, Hellenic Bank's baseline credit assessment (BCA) and adjusted BCA were upgraded to caa1 from caa2, and its long-term Counterparty Risk Assessment (CRA) to B1(cr) from B2(cr). The outlook on both banks' long-term deposit ratings is positive.

Credit ratings

- On 14/09/2018, S&P Global Ratings raised Cyprus long- and short-term foreign and local currency sovereign credit ratings on Cyprus to 'BBB-/A-3' from 'BB+/B' placing it back to investment grade with a stable outlook.
- As a result of this upgrading, Cyprus government bonds are again accepted as collateral for Eurosystem credit operations. At the same time, they are again eligible under the Public Sector Purchase Program (PSP) for the procurement of public sector assets in the secondary markets.
- Furthermore, on 19/10/2018 Fitch Ratings upgraded Cyprus's Long-Term Foreign-Currency Issuer Default Rating (IDR) to 'BBB-' from 'BB+' placing it back to investment grade with a stable outlook.
- Additionally, on 23/11/2018, DBRS Ratings upgraded Cyprus's Long-Term Foreign and Local Currency-Issuer Ratings from 'BB' to 'BBB (low)' placing it to investment grade with a stable outlook.
