

MACROECONOMIC MONITOR OF CYPRUS

June 2018

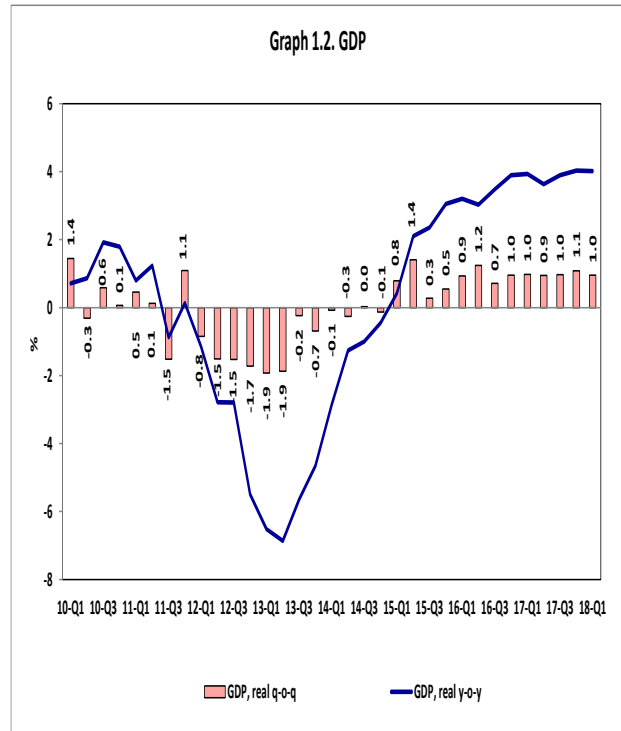

MACROECONOMIC MONITOR OF CYPRUS

Updated on 18 June 2018

- **In the 1st quarter of 2018, GDP** (in seasonally adjusted terms) **recorded a positive rate of growth of 4.0%, same as in the 4th quarter of 2017** on an annual basis (see graphs 1.1-1.2). The increased activity was broad based and is mainly attributed to sectors: hotels and restaurants, retail and wholesale trade, construction, manufacturing, professional, scientific and technical activities and administrative and support service activities (see graphs 3.1-3.4 and 6.1-6.2).
- Developments are currently driven by increases in **private consumption and net exports** (see graphs 2.1-2.4).
- The economic sentiment indicator (ESI-CypERC) in May 2018, decreased by 2.9 points compared with April 2018 (see graph 1.3); the decline resulted from a worsening of economic confidence in services, industry, and among consumers. Compared with May 2017, it has decreased by 0.2 points.
- During the period January-May 2018 **tourist arrivals increased at a rate of 14.5%** compared to January-May 2017 (see graph 6.3). An increase of 18.7% was recorded in tourist arrivals from Greece, a 15.3% increase from Germany, a 9.6% increase from the UK, while a 4.4% decrease was recorded from Russia.
- **Employment** developments reflect conditions of strong economic activity (see graphs 4.1 and 4.4). Employment in persons **increased by 4.0%** in the 1st quarter of 2018 compared to the 1st quarter of 2017. Increases were mainly in the sectors of construction, accommodation and food service activities, wholesale and retail trade, manufacturing and professional, scientific and technical activities.
- **Labour Force Survey (LFS) unemployment**, in monthly seasonally adjusted terms, decreased to **8.6% in April 2018 compared to 11.7% in April 2017** (see graphs 4.2-4.3). The most affected segment of the population is youth unemployment, although it has been on a downward trend since the 3rd quarter of 2013 falling to 23.1% in 2017Q4 from the peak of 40.4% in the 3rd quarter of 2013. Particularly challenging is also the relatively high long-term unemployment.
- **Compensation per employee** increased by 1.0% in the 1st quarter of 2018 compared to the 1st quarter of 2017 (see graphs 5.3-5.5).
- **Inflation (HICP)** in May 2018 increased by 1.0% compared to a decrease of 0.3% in April 2018 (see graph 5.1). For 2018 so far, it stands at -0.3%. Core HICP inflation was at -0.1% in January-May 2018 (see graph 5.2). All subcategories of HICP presented a decrease except categories of housing, water, electricity and gas, health, transport, education and restaurants and hotels.
- **Imports of goods increased by 18.2%** in January-April 2018 compared to January-April 2017. The increase in imports is affected by developments in imports of transport equipment (aircrafts and vessels). Imports of goods, excluding imports of aircrafts and vessels, exhibit an increase of 13.1%.
- **Exports of goods increased by 97.3%** in January-April 2018 compared to January-April 2017 due to exports of transport equipment (aircrafts and vessels) occurred in 2018. Exports of goods, excluding exports of aircrafts and vessels, exhibit an increase of 23.3%.
- The **current account (CA)** balance deteriorated in 2017, recording a deficit of €1,291.0 mn (-6.7% of GDP) compared with a deficit of €888.8 mn (-4.9% of GDP) in 2016. The deterioration was mainly attributed to a deterioration of the trade balance in goods, with imports of goods, mostly ships and aircraft, being significantly higher in 2017 compared to 2016. The current account balance was, to a lesser extent, negatively affected by the deterioration recorded in primary income and, more specifically, portfolio income. In contrast, the services sector recorded an improvement, which occurred mainly in the travel and telecommunications, computer and information categories. Also, a small improvement was recorded in secondary income. The CA balance for 2017, adjusted to exclude imports/exports of Special Purpose Entities (SPEs) that primarily operate in the shipping industry (ship registration/deregistration) with a small footprint on the economy, records a deficit of -1.5% of GDP compared to a deficit of -0.2% of GDP the year before.

- The **primary income** recorded a **deficit of €489.8 mn** in 2017 compared to a deficit of €284.9 mn in 2016 (see graph 6.4).
- The **secondary income** recorded a **deficit of €425.1 mn** in 2017 compared to a deficit of €462.4 mn in 2016 (see graph 6.4).
- The **international investment position (IIP)** (see graph 6.5) recorded a marginal improvement in 2017, showing a net liability position at €23.139 mn, compared with €23.167 mn in 2016. The decrease in Cyprus' net liabilities was mainly due to the improvement in portfolio investment and other investments. Direct investment, in contrast, deteriorated in 2017 and outweighed to a large extent the aforementioned improvements.
- The **gross external debt** reached €107.058 mn in 2017, compared with €107.284 mn in 2016. The small improvement was due to the decrease of debt in other sectors, which resulted from the decrease in loans and, to a lesser extent, the decrease in the debt of monetary financial institutions (excluding the CBC). Intercompany lending, on the other hand, recorded a deterioration which mitigated, to a large extent, the abovementioned decreases.
- **General government budget balance (GGBB)** was in surplus in January-April 2018, of the order of €425.1 mn (2.1% of GDP) compared to a surplus of €191.9 mn (1.0% of GDP) during the corresponding period the year before (see graph 9.1).
- **General government primary balance (GGPB)** was in surplus in January-April 2018, of the order of €517.7 mn (2.6% of GDP) compared to a surplus of €292.5 mn (1.5% of GDP) during the corresponding period the year before (see graphs 9.1-9.2).
- **Total revenue** exhibited a positive rate of growth of about 13.6%, reaching €2,509.8 mn in January-April 2018, compared to €2,209.3 mn during the corresponding period the year before (see graph 9.3).
- **Total expenditure** exhibited a positive rate of growth of about 3.3%, reaching €2,084.7 mn in January-April 2018, compared to €2,017.4 mn during the corresponding period the year before (see graph 9.3).
- Monetary Financial Institutions (MFI) **loans to domestic residents** (private sector), **decreased** with an **annual rate of 1.1%** in April 2018, affecting both households and enterprises (see graphs 8.2-8.4). This is reflecting the tight lending conditions (see graphs 8.7-8.8).
- **Deposits of domestic** residents held with MFIs (private sector) exhibited an increase translating into an **annual rate of 2.6%** in April 2018, reflecting the improving performance of the economy (see graph 8.1).
- Overall **lending and deposit interest rates** in Cyprus continue to decline, creating an environment conducive to growth (see graph 8.5). In April 2018, **deposit interest rates** for maturity of up to 1 year and of up to 3 months decreased compared with the preceding month. The **lending interest rates** to households for primary residence decreased and the rate for other loans up to €1 mn for businesses increased. The interest rate for bank overdrafts to non-financial corporations decreased. A significant deviation of the Cypriot interest rates, compared to the euro area average still prevails.
- Eurostat's **house price index** for Cyprus recorded a decrease of **3.0%** in the **4th quarter of 2017** compared to the 3rd quarter of 2017 and an increase of 2.4% compared to the 4th quarter of 2016.
- The CBC's **residential property price index** recorded an increase of **0.4%** in the **4th quarter of 2017** compared to the 3rd quarter of 2017 and an increase of 1.5% compared to the 4th quarter of 2016. Cumulative from the 1st quarter of 2008 it has declined by 28% (see graph 7.1), revealing an adjustment to the conditions of lower domestic and foreign demand.
- According to the Department of Lands and Surveys, new sale contracts were up by 30.5% while, transfers of property were up by 30.4% in January-May 2018 compared to January-May 2017 (see graph 7.3). MFI mortgage loans to domestic residents for housing declined with an annual rate of 0.7% in April 2018 (see graph 7.2).
- The Cyprus Government bond yield was above the respective German Government bond yield by 17 basis points on 18/06/2018 (see graph 8.6, yields refer to the bonds maturing in 2020).
