MACROECONOMIC MONITOR OF CYPRUS

Updated on 18 January 2024

Macro Economy

- In the 3rd quarter of 2023, GDP (in seasonally adjusted terms) recorded a positive rate of growth of 2.2%, same as in the 2nd quarter of 2023 on an annual basis (see graphs 1.1-1.2). The positive GDP growth rate is mainly attributed to the sectors: "Hotels and Restaurants", "Transport and Storage", "Wholesale and Retail Trade, Repair of Motor Vehicles", "Information and Communication", "Construction", "Arts, Entertainment and Recreation" and "Other Service Activities" (see graphs 3.1-3.4 and 6.1-6.2).

- Developments (in seasonally adjusted terms) currently driven mainly by increases in consumption and gross fixed capital formation (see graphs 2.1-2.4).

- In December 2023, economic sentiment in Cyprus deteriorated, as the Economic Sentiment Indicator (ESI- CypERC) decreased by 4.6 points compared with November 2023 (see graph 1.3). The decrease in the ESI-CypERC was driven by weaker business confidence primarily in services and, to a lesser degree, in construction.

- For the period of January-December 2023, arrivals of tourists totaled 3,845,652 compared to 3,201,080 in the corresponding period of 2022, recording an increase of 20.1% (see graph 6.3). Arrivals from the United Kingdom were the main source of tourism for December 2023, with a share of 23.4% of total arrivals, followed by Poland with 11.5% and Greece with 10.3%.

- Employment developments reflect conditions of improved economic activity. Total employment increased by 1.6% in the 1st nine months of 2023 compared to the same period in 2022. The most significant percentage increases were observed in the economic activities of Accommodation and food service activities, Wholesale and Retail Trade, Manufacturing, Public administrations and Human health and social work activities.

- Labour Force Survey (LFS) unemployment, in monthly seasonally adjusted terms, decreased to 5.8% in November 2023 compared to 7.2% in November 2022 (see graphs 4.2-4.3). The most affected segment of the population is youth unemployment, although it has been on a downward trend since the 3rd quarter of 2013 falling to 17.7% in the 3rd quarter of 2023 from a peak of 40.7% in the 2nd quarter of 2013.

- Compensation per employee recorded an increase of 4.9% in the 1st nine months of 2023 compared with the same period in 2022 (see graphs 5.3-5.5).

- Inflation (HICP) in December 2023 recorded an increase of 1.9% compared to an increase of 2.4% in November 2023 (see graph 5.1) and for January-December 2023 it stands at 3.9%. Compared to January-December 2022, the largest changes were noted in Food and Non-Alcoholic Beverages (8.0%) and Restaurants and Hotels (6.4%). Core HICP recorded an increase of 4.4% in January-December 2023 (see graph 5.2).

- Imports of goods recorded an increase of 12.0% in January-November 2023 compared to January-November 2022. Imports are affected by developments in imports of transport equipment (aircrafts and vessels). Imports of goods, excluding imports of aircrafts and vessels, exhibit an increase of 8.7%.

- Exports of goods recorded an increase of 8.6% in January-November 2023 compared to January-November 2022. Exports of goods, excluding exports of aircrafts and vessels, exhibit an increase of 15.5%.

External Sector

- The current account (CA) balance of Cyprus (see graph 6.4) recorded a deterioration, with the deficit increasing from €399.0 mn (-1.4% of GDP) in 2022Q3, to €517.0 mn (-1.7% of GDP), in 2023Q3. The increase in the Current Account deficit resulted mainly from the deterioration of the deficits of Goods and of Primary and Secondary Incomes. In particular, the increase in the deficit of Goods, the deterioration of the deficit in Primary Income and, to a lesser extent, the increase in the deficit of Secondary Income, contributed to the increase of the deficit. The aforementioned developments were partly offset by the increased surplus of Services. The resulting deficit adjusted for the impact of Special Purpose Entities (SPEs), that is, classifying SPEs as non-residents, stood at €408.9 mn (-1.4% of GDP) in 2023Q3, compared with a deficit of €548.8 mn (-2.0% of GDP) in 2022Q3. For the 1st nine months of 2023 the deficit decreased from €2,124.2 mn (-7.6% of GDP) in 2022/9m, to €2,688.3 mn (-9.0% of GDP), in 2023/9m.

- The international investment position (IIP) (see graph 6.5) recorded an improvement in 2023Q3, presenting a net liability position of €28,267.5 mn, compared with a net liability position of €28,658.3 mn in 2023Q2. With the corresponding data being adjusted for the impact of SPEs, IIP recorded a net liability position of €10,130.7 mn in 2023Q3, compared with a net liability position of €10,710.7 mn, in 2023Q2.

- The **gross external debt** decreased to €162,317.2 mn in 2023Q3 from €169,614.3 mn in 2023Q2. The external assets in debt instruments increased to €152,975.5 mn, up from €146,830.5 mn in 2023Q2. Consequently, the net external debt decreased by €13,441.7 mn to €9,342.1 mn in 2023Q3. Adjusted for the impact of SPEs, gross external debt reached €58,261.2 mn in 2023Q3, compared to €58,513.4 mn, in 2023Q2. The corresponding net external debt indicator decreased to -€14,534.8 mn in 2023Q3, compared with -€12,822.1 mn in 2023Q2.
